Special Issue: Archaean Tectonics, Volume 1

Archaean tectonics in 2001: an Earth odyssey
M.J. Van Kranendonk 1

A critique of the analogy between Archaean and Phanerozoic tectonics based on regional mapping of the Mesozoic-Cenozoic plate convergent zone in the Makran, Iran
G.J.H. McCall 5

The origin and evolution of Archean lithospheric mantle
W.L. Griffin, S.Y. O'Reilly, N. Abe, S. Aulbach, R.M. Davies, N.J. Pearson, B.J. Doyle and K. Kivi 19

Contribution of mantle plumes, crustal thickening and greenstone blanketing to the 2.75–2.65 Ga global crisis
P.F. Rey, P. Philippot and N. Thébaud 43

Archaean cratonization and deformation in the northern Superior Province, Canada: an evaluation of plate tectonic versus vertical tectonic models
J.H. Bédard, P. Brouillette, L. Madore and A. Berclaz 61

Formation of Earth's early Archaean continental crust
R.H. Smithies, D.C. Champion and K.F. Cassidy 89

Late Archaean granites: a typology based on the Dharwar Craton (India)
J.-F. Moyen, H. Martin, M. Jayananda and B. Auvray 103

A new class of silica enriched, highly depleted komatiites in the southern Kaapvaal Craton, South Africa
A.H. Wilson 125

Upper mantle processes beneath the 2.7 Ga Abitibi belt, Canada: a trace element perspective
D.A. Wyman 143

Archean ocean-floor metamorphism in the North Pole area, Pilbara Craton, Western Australia
M. Terabayashi, Y. Masada and H. Ozawa 167

A review of the geochronological constraints on the evolution of the Kaapvaal Craton, South Africa
M. Poujol, L.J. Robb, C.R. Anhaeusser and B. Gericke 181

Mid to late Archaean (3.3–2.5 Ga) tonalitic crustal formation and high-grade metamorphism at Mt. Riiser-Larsen, Napier Complex, East Antarctica
T. Hokada, K. Misawa, K. Shiraishi and S. Suzuki 215

Archaean orogen-parallel extension: evidence from the northern Eastern Goldfields Province, Yilgarn Craton
B.K. Davis and E. Maidens 229

Lithostratigraphy and tectonic evolution of contrasting greenstone successions in the central Yilgarn Craton, Western Australia
S.F. Chen, A. Riganti, S. Wyche, J.E. Greenfield and D.R. Nelson 249

Two linear granite belts in the central-western North China Craton and their implication for Late Neoarchaean-Palaeoproterozoic continental evolution
M. Zhai, J. Guo, Y. Li, W. Liu, P. Peng and X. Shi 267

doi:10.1016/S0301-9268(03)00297-3

The Seridó Group of NE Brazil, a late Neoproterozoic pre- to syn-collisional basin in West Gondwana: insights from SHRIMP U–Pb detrital zircon ages and Sm–Nd crustal residence (T_{DM}) ages
W.R. Van Schmus, B.B. de Brito Neves, I.S. Williams, P.C. Hackspacher, A.H. Fetter, E.L. Dantas and M. Babinski 287
Structure, Sr–Nd isotope geochemistry and zircon U–Pb geochronology of the granitoids of the Dabakala area (Côte d'Ivoire): evidence for a 2.3 Ga crustal growth event in the Palaeoproterozoic of West Africa?
D. Gasquet, P. Barbey, M. Adou and J.L. Paquette 329
Extensional detachment faulting and core-complex formation in the southern Barberton granite–greenstone terrain, South Africa: evidence for a 3.2 Ga orogenic collapse
A.F.M. Kisters, G. Stevens, A. Dziggel and R.A. Armstrong 355

Comment

Correlations between the Eastern Block of the North China craton and the South Indian Block of the Indian Shield: an Archaean to Palaeoproterozoic link—Comment
R. Mazumder 379
A comment on "Correlations between the Eastern Block of the North China Craton and the Southern Indian block of the Indian Shield: an Archaean to palaeoproterozoic link"—Reply
G. Zhao, M. Sun and S.A. Wilde. 381
